

The Lone Ranger & Tonto

High Noon at the ET Saloon

CV61 USS Ranger, 1987

Lone Rnager

Contents

- Introduction
 - Parallel lives
 - Then a strange convergence
- Contact!
 - A quarter century apart, but it's still news from nowhere
- Space-Time & Beyond
 - Fork in the path
 - Physics vs. metaphysics
- Exopolitics
 - MJ12 – Aviary
 - Birds of a feather
- Dan and Jack mix it up on the Internet
 - A fist-fight in heaven?
- Showdown/Showtime
 - ET vs. UT
 - Jack pushes physics to the brink
 - Danny pulls an ace out of his sleeve
 - It's getting ugly at the ET Saloon

Introduction

*Where Do We Come From?
Who are We?
Where are We Going?*

Paul Gauguin
1897

- Here we take a biographical approach to confronting the question of the ages.
 - Don't we all want to know what makes the world go around?
- Six years apart in age, but we were both Sputnik babies.
 - Well, we were born on two sides of the tracks, and we are now on two sides of the 'green door'.
 - Trust us, it's all part of the plan.

(Cont.)

Introduction (cont.)

- Jack was contacted in 1952
 - It was a computer onboard a space ship from the future. The voice was metallic.
- Danny had to wait 25 years.
 - Sophia was warm and fuzzy.
 - It was worth the wait.
- This is the story of the lab raised chimps
 - One chimp has a cold wired surrogate mother
 - The other has a warm and fuzzy surrogate mother
 - Guess which one is more exploratory?
 - It's Danny Boy who ventures off the deep end of space-time.
 - Jack stays closer to the physics establishment

(cont.)

Introduction (cont.)

- **Anthropic Cosmological Principle**
 - This is a major part of Jack's first book.
 - Danny is deep into this concept when he encounters Sophia in 1977.
 - This encounter has a decidedly theistic flavor.
 - Prior to this Danny was a self-styled transcendental pantheist.
- **Next comes the exopolitics...**
 - Here again Jack has all the seniority.
 - Child prodigy – contactee
 - Could Uncle Sam ignore such a one?
 - But Danny is not going to be left out
 - He had another experience in 1991
 - Shouldn't he call 911?
 - Thus do we encounter the 'weird desk'.
 - A couple of years later Dan is introduced to Jack by a ufologist
 - Dan introduces Jack to Ron
- **And so we come to MJ12 and the Aviary.**

Space-Time & Beyond

Jack instigates it all.

Danny takes it all in.

Published 1975

- Jack sticks his neck out, metaphysically
 - This is the early Jack, in his hippie mode.
 - Jack sobers up
 - He returns to work within the system, pushing the envelope of physics
- Danny Boy, having once given up on physics, also returns to push the boundaries.
 - Finding them unyielding, he strikes out on his own into the strange world of metaphysics.
- Where will they meet again?
 - On opposite sides of the 'green door' in Area 51!
 - This is the gateway to the stars and beyond
 - Will they be able to open the door?

Exopolitics

- The story of phenomenology
 - Uncle Sam keeps his eyes on the skies
 - Not only do you track the phenomena, but also the people associated with the phenomena
 - Jack & Dan?
 - Jurisdictional issues
- Aviary & the phenomenology network
 - Two intertwining concerns
 - Physical & metaphysical
 - The radar doesn't always work
 - Remote viewers get into the act: ~1980
 - » Military vs. scientific
 - Going public
 - Desert games
 - 'MJ-12' documents
 - TV disclosure
 - 'Pelican' & the 'weird desk'
 - 'high strangeness'
 - Non-linear phenomena
- MJ-12 & the Visitors
 - And the verdict is:
 - Biggest hoax?
 - Strategic cover?
 - Global psy-op?
 - Visitation: How? vs. Why?
 - It's about the hardware, stupid.
 - It's about the software, stupid.
