

Parousia by the Bay

Conclave of The Knights Extemporalis

Café Trieste

May 25, 2005

Summary

- Introduction
- Microcosm & Cosmos
 - Cells, particles, words, music & numbers
 - Plato vs. Pythagoras, Aristotle, Socrates, etc.
 - Genius – coherence – observer
 - S. Ramanujan
- Holism, coherence
 - TOE/GUT
 - UEM, Anthropic, MG
 - Archetypes, teleology
- Lessons of the Mandelbrot
 - The phenomenology of numbers
 - Organicity of all things
 - Mother of the archetypes – AZO/X/QRP

(cont.)

Summary (cont.)

- Network of being
 - Coherence theory
 - Cosmic intelligence
- Bootstrap dynamics
 - Self-excited circuit
 - Wheeler, Feynman, etc.
 - Ouroboros
 - Channeling the Matrix
 - Chaos vs. order
 - PSR, Rational Theism
 - Cloning, microcosmics, combinatorics
 - Into the BPW
 - AZO/X/QRP

(cont.)

Summary (cont.)

- Creation/creator
 - Morpheus to metamorphosis
 - Self-sacrificing Creator
 - Earth/cocoon
 - Anthropics to anthropo-/geo-centrism.
 - Pearl divers
 - Grail quest
 - Magic formula vs. M-brot
 - » Jack vs. Dan
- Parousia, Millennium, Eschaton
 - Rationalizing the X-event
 - Rationale for Y2X
 - Visitors/Magi : Majic12 : Aviary : Aquarium : EFG
 - Ron, Dan & Jack show
 - DNI: Humint, Sigint, Imint & Masint
 - 'Phenomenology' and high strangeness
 - Trinity site to 9/11 to 2005
 - Portals to the eschaton

Talking Points 1

- I see three overlapping meta-themes or issues. There will be much bouncing back and forth.
- Teleology – Jack vs. Dan
 - Anthropics -- weak vs. strong
 - Eschatology – implicit vs. explicit
 - Physicalism vs. immaterialism
 - Dan introduces the mysterious Mandelbrot, exemplifying the Telos at work
- ET encounters – two scenarios
 - Jack: mainly hostile ET version – competitive
 - Dan: mainly benign UT version – cooperative
 - Both versions will include MJ12 and Aviary developments
 - Disclosure & disinformation -- Jack vs. Dan
- Metanarratives
 - Transhumanism vs.
 - Best possible world
 - In both instances we are at an historical juncture
 - When and how will these issues be resolved?

(cont.)

Talking Points 2 (cont.)

- Saving the world
 - From what?
 - For whom?
 - What is our responsibility?
 - Let the BPW take care of itself?
- No consequences?
 - BPW = min necessary consequences
 - Were there consequences for Xian vs. Islam?
 - Not BPW for Muslims?
- Why should Jack's people care?
 - Why should physicists care?
 - Responsible for Bomb
 - Make amends
- High Strangeness
 - Idiosyncratic, dreamlike
 - Explains why most physicists ignore ufos
- BPW should be a no brainer
 - Problems with Darwinism
 - Social Darwinism
 - Meaninglessness, alienation
 - Scientific deconstruction has not been challenged in a global context.
 - responsibility of cosmologists
- Mind over matter
 - Ufos permit a rethinking of the world
 - Ignore opportunity?
 - Go for coherence and synthesis
 - tell the most uplifting story possible

(cont.)

Talking Points 3 (cont.)

- Why are Jack and I still talking?
 - What is Ron's involvement?
 - What would be the goal of a publication?
 - Who has more room for maneuver?
- Paradigm/gestalt switch
 - Opportunity for more than just technological change
- How will metaPh inform phys?
 - About the eschaton
 - About a creator
 - This is where the futurists fall down
 - They ignore the recursive aspects of their own scenarios, where we become our own creators.
 - Even a modicum of teleology will amplify itself
 - Bootstrap applies mainly to intelligence
 - About **portals**
 - About archetypes
 - Mandelbrot
 - I don't know what Jack will say about archetypes

(cont.)

Talking Points 4 (cont.)

- Past discussions
 - Can there be mind w/o an archetypal self?
 - Once you let a self in the door, it is hard to shut it against all sorts of metaphysics.
 - Jack is the mad inventor: *Back to the Future*.
- Strategy
 - Not allow metaPh?
 - Many will be turned away
 - Very few physicists will notice
 - If allowed?
 - Yes, it will tend to take over. Can't be helped.
 - Scientists are worried about the slippery slope.
 - Ufologists have a history of neglecting the weird.
 - Ron knows better.

Trieste

Book project

- Do we need a sceptic?
- What other role?
- John, Paul, trickster,
- What will we need from Ron?
- Anthropic
- Start off with an irreducible self
- Why could do a hypothetical mind physics section
- we need this for portals
- Portal is mini-eschaton
- Area 51 -- Dreamland
- How do we script the breakdown of physics?
- Opposite of pokatok portal
- Immersion VR
- Higher self waits on us
- Why did ufology never pick up on the R & D show?
- They were not supposed to.
- Portal is like changing states of consciousness
- This includes the collective Cs
- The switch has to be slow
- In which state is the higher self?
- Like changing cycles
- Emergence of physics in pokatok
- Is there programming?
- UEM? @ pokatok
- Gravity would be the first place
- Expectations abound
- Air friction?
- Damping of fluctuations
- PSR -- min deviations
- what about the gravity on the moon?
- How did that get determined?
- Sun came first
- Solar phys and orbital dynamics
- Isaac Newton
- $1/r^2$
- So what?
- Counterfactuals
- Newt's laws \gg LAP
- Min arbitrariness
- Phys removes busy work
- How does phys get done?
- Math and PSR are syn
- PSR = TOE
- BPW = LAP
- All these go together

Introduction

– (adapting material from the BPW-Physics presentation)

- Plato vs. Pythagoras

- I'd like to find a least abstract lead-in.
- Plato's static forms continue to dominate scientific thought
- Jack introduces Pythagorean and Aristotelian concepts back into physics.
 - Mind, teleology, information, pilot waves, ODLRO, etc.
 - The quantum field serves as God's sensorium.

- Jack hesitates to once again venture out *Beyond Space & Time*.

- But if we want to commune with cosmic intelligence, we must be prepared to stretch our own minds to the limit.
 - UFO phenomena should stretch our imaginations
- Jack's firm grasp on physics makes him the go to guy for one such as myself who needs a bridge from metaphysics back into the scientific community.
- Designing such a bridge provides the context for this gathering.
- Welcome to the Jack & Dan show, celebrating its first decade.

Jack waiting for his ship to come in

He likes to take the big gamble. Dan is the minimalist
